Revit 2018 + Add To Library

Autodesk® Revit® is the premier Building Information Modeling (BIM) tool for engineering and design professionals in the industries of architecture, structural engineering, and construction. Revit is the most popular architectural design tool from Autodesk, as its versatile functionality includes model creation, data organization and analysis, and the creation of impressive documentation and presentations. And, because Revit works within the world of BIM, one of its greatest benefits is it gives users the ability to easily coordinate the model across disciplines.

SNAPSHOT

Videos are short and to the point, usually ranging from 2-5 minutes, specially designed to help Autodesk software users find the answers to their questions quickly and get designing faster.

Audio transcript is available too.

Learners Online,

Recognizing Parametric Relationships

and click to enter the wall end point as well as the start point of the next wall. Then move the cursor down and click to enter the end point. Click Modify to end the Wall command. **Now there are two walls.** When you select the vertical wall and use the arrow keys to move the wall to the right or left, the horizontal wall updates as well. You can even use the mouse to drag the wall, and the elements remain connected. This connection is considered a parametric relationship. When one of the

Getting Started

Revit Fundamentals

- Understanding BIM
- Implementing BIM
- Understanding Typical BIM Workflows
- Understanding How Revit Fits into BIM
- Understanding the Difference Between BIM and CAD
- Understanding Project Setup and Workflows
- Establishing Folder Structures and Naming Conventions
- Understanding Information in Revit Models
- Developing Design Presentation Standards
- Understanding Revit Concepts
- Understanding Bidirectional Associativity
- Recognizing Parametric Relationships**
- Understanding Families
- Placing Model Elements
- Sketching Model Elements
- Placing View-Specific Elements
- Working with Datum Elements
- Placing Elements from the Project Browser
- Loading Families and Using Type

SUBSIDIES

Option 1

CASH PAYOUT

40% cash back

on ALL PIC activities

i.e. $40\% \times \$100,000$ spent
= **\$40,000** cash back to you per year

Option 2

TAX DEDUCTION

400% tax deduction

on ALL PIC-Claimable Activities during your company's financial year

i.e. $400\% \times \$100,000$ spent
= **\$400,000** tax deduction per year
